Oak Creek Just Keeps Getting Better And Better

Larry Weishuhn with Oak Creek deer.

"Mr. Whitetail," Larry Weishuhn, has hunted Oak Creek Whitetail Ranch in the Missouri Ozarks three times. "From what I saw there last year...200-inch-plus bucks that were left to mature one more season...there are going to be some scary bucks in coming years."

Weishuhn's predictions Come True In 2010

During the first three weeks of the 2010 season, three Oak Creek Whitetail Ranch

hunters took six 300-inch-plus deer.

In just one season (2009), Oak Creek Whitetail Ranch placed 26 deer in the top 25 Midwestern SCI...typical and non-typical categories of all time, including seven of the top 10 Typical...five of the top 10 Non-Typicals. Oak Creek Whitetail Ranch hunters hold six #1 SCI Midwestern Whitetail Records of all time, including the new #1 SCI Typical Rifle,

Trijicon[®], Inc. Introduces New TrijiDot[™] Fiber Optic Shotgun Sight

Shotgun shooting isn't always a point-and-shoot proposition. Many scenarios require a careful sight picture, leaving standard bead sights in the dark! New for 2011, Trijicon, the world leader in **Brilliant Aiming Solutions[™]**,

is excited to offer its first fiber optic bead sight specifically designed for ribbed-barrel shotguns.

Perfectly suited for a wide range of applications, Trijicon's new TrijiDot provides a bright reference point for upland hunters, waterfowlers, turkey hunters and all clay-target shooting disciplines. The TrijiDot is also the perfect addition to ribbed-barrel shotguns for tactical and home defense applications.

Designed to deliver the ultimate in brightness and durability, the **TrijiDot[™] Fiber Optic Shotgun Sight** features proprietary Trijicon fiber optics that magnify and focus ambient light to provide a brilliant aiming point in a wide range of lighting conditions. The moderate-sized 4mm fiber optic is available in Red or Green.

The TrijiDot fiber optic is housed in a protective base that's constructed of aircraft-grade 6061-T6 aluminum and features a hard anodized black oxide coating to withstand heavy shotgun recoil, intense barrel temperatures, and years of extreme use in the field. Installation is easy, and the sight is

"Your Mountain "PH" is beyond question, the finest safari boot I have ever worn"

"I just returned from a fabulous 14-day hunting safari in Zimbabwe, and I would like to take this opportunity to share with you my experiences with your wonderful Mountain "PH" hunting boot which I wore exclusively on this safari. This is my second safari season with the same pair of Russell Mountain "PHs". I have worn your boots on every African safari I have undertaken during the last 11 years, from Tanzania to Namibia. To say that my experiences with your fine products have been anything less than fabulous would be a gross understatement.

"Your Mountain "PH" is beyond question, the finest safari boot that I have ever worn in Africa. Every aspect of this boot represents the very zenith of quality in terms of thoughtful, considerate design; materials, fit, finish, and true best-quality craftsmanship. In my opinion, it simply cannot be improved upon. I require footwear that offers a bit more support than many of the more traditional safari boots, and the Mountain "PH" fulfills these requirements perfectly. Everything about it, from the Vibram Sierra sole, to the triple-vamp,

Weather-Tuff leather construction and padded collar contributes to it's superb functionality, durability, and comfortable fit."

Sincerely,

Allen E. Day -- Dundee, Oregon

Fratelli Piotti Guns Define "Fine Gun"

Fratelli Piotti implies embracing a philosophy that guns can be called fine only when they are really second to none." this is a line from the catalog of Fratelli Piotti and it accurately describes the way that they approach the manufacture of their guns.

Fratelli Piotti offers best quality traditionally crafted guns in side by side boxlock, sidelock and hammer configuration as well as a Boss type sidelock over/under and side by side double rifles.

Each gun is built to order, one at a time, entirely within their factory using only the finest materials available. They have relationships with the world's finest and best known engravers and

can provide virtually anything that the customer desires.

Because they start each gun only with raw materials and fresh ideas, they are able to produce guns that are built to the customer's exact specifications. They do not outsource any parts or work and thus are able to maintain the highest levels of quality control.

Fratelli Piotti guns are the tangible expression of unmistakable taste and the unsurpassed level of quality has made their guns famous all over the world. Indulge your desires with a made to order fine gun from Fratelli Piotti.

See the guns in person and Manuel Piotti in booth # 2610.
